

ABSTRACT OF THE DISCLOSURE

A method and apparatus are disclosed to enhance access to an archive of motion picture assets for which the storage volume has been physically reduced. All B-negative, trims and outs, sound rolls, mag, dailies, work prints, scripts, and reports are manually consolidated and indexed by a computer database retain accessibility. The consolidated assets are digitized and made available in thumbnail versions to users remote from the archive, thereby increasing the availability, usability, security, and value of the consolidated assets.
